

## INSTANT SNOW

### Ingredients

- [Instant Snow Polymer](#)
- Water
- Transparent Cup

### Science Terms

- **Polymer** – A chemical compound made by linking smaller molecules in a long, repeating chain.

### Instructions

**STEP 1:** Place one teaspoon of Instant Snow Polymer into the transparent cup.

**STEP 2:** Quickly add two ounces of water to the transparent cup and watch.

### Explanation

The Instant Snow Polymer is a Superabsorbent Polymer. The powder is able to absorb as much as 500 times its mass of water within a few seconds.

## HOOKED ON SCIENCE DISCLAIMER

Each Hooked on Science experiment is safe to perform with an adult present. If not performed correctly the experiment could be dangerous. Jason Lindsey, Hooked on Science, and ALL Hooked on Science affiliates expressly disclaims all liability for any occurrence, including, but not limited to, damage, injury or death, which might arise as consequences of the use of any experiment(s) online or on air. The guardian of the child and the performer of the experiment assume all the liability and will use these science experiments at their own risk!
