

NAKED EGG

Ingredients

- Raw Egg
- Tall Drinking Glass
- Vinegar

Science Terms

- **Acid** – An acid taste sour, is corrosive to metals, changes litmus paper red, and becomes less acidic when mixed with a bases.

Instructions

STEP 1: Place an egg in the tall drinking glass.

STEP 2: Pour the vinegar over the egg.

STEP 3: 24-hours later, rinse the egg under the facet.

Using your fingers rub the

egg until the shell is completely removed from the egg.

STEP 4: Hold your naked egg up to a light and take a peek inside.

Explanation

The vinegar is an acid, which breaks down the eggshell. As the egg eggshell is dissolved, the invisible membrane hiding under the shell is revealed.
